

Department of Energy

Washington, DC 20585

November 10, 2005

MEMORANDUM TO: Distribution

FROM: John Spitaleri Shaw
Assistant Secretary for
Environment, Safety and Health

SUBJECT: Federal Electronics Recycling and Reuse Challenge

The Office of the Federal Environmental Executive has recently announced a *Federal Electronics Recycling and Reuse Challenge* (FERRC) to begin on America Recycles Day, November 15, 2005, and continuing until Earth Day, April 22, 2006 (see attachment).

The Federal government is the largest information technology equipment purchaser, user, and ultimately, disposer in the world. The FERRC provides an opportunity for Federal agencies, including the Department of Energy (DOE), to highlight and be recognized for their environmentally responsible management of surplus electronics, in particular, the reuse and recycling of surplus computers and other electronic equipment versus disposal of them in landfills.

Federal facilities participating in the FERRC will be provided with information and assistance on the donation of operable surplus computers and other electronic equipment to "Computers for Learning" and Hurricane's Katrina and Rita relief efforts, and the disposition of inoperable surplus electronic equipment with reputable electronic recyclers.

In my role as the Department's Agency Environmental Executive, I encourage all program and field elements to participate in the FERRC. The FERRC is open to all DOE sites, including those who have previously joined the *Federal Electronic Challenge* (FEC) as a "partner" (http://www.eh.doe.gov/P2/fec/EH1_IM1_FEC_Memo20Jun05.pdf).

If you have any questions concerning the FERRC, in particular, or the FEC in general, please contact Jeff Eagan of my staff at 202-586-4598 (email: jeff.eagan@eh.doe.gov).

DISTRIBUTION:

Program Secretarial Officers:

Paul Golan, Acting Director, Office of Civilian Radioactive Waste Management
Douglas Faulkner, Acting Assistant Secretary for Energy Efficiency and Renewable Energy
James Rispoli, Assistant Secretary for Environmental Management
Mark Maddox, Principal Deputy Assistant Secretary for Fossil Energy
R. Shane Johnson, Acting Director, Office of Nuclear Energy, Science and Technology
Raymond Orbach, Director, Office of Science
Michael Owen, Director, Office of Legacy Management

Administrators for Power Marketing Administrations:

Stephen Wright, Administrator, Bonneville Power Administration
Charles Borchardt, Administrator, Southeastern Power Administration
Michael Deihl, Administrator, Southwestern Power Administration
Michael Hacskeylo, Administrator, Western Area Power Administration

Operations and Field Office Managers:

Marvin Gunn, Jr., Manager, Chicago Office
Elizabeth Sellers, Manager, Idaho Operations Office
Gerald Boyd, Manager, Oak Ridge Office
Keith Klein, Manager, Richland Operations Office
Jeffrey Allison, Manager, Savannah River Operations Office
John Kersten, Manager, Golden Field Office
Robert Warther, Manager, Ohio Field Office
Frazer Lockhart, Manager, Rocky Flats Field Office
Carl Bauer, Director, National Energy Technology Laboratory (Morgantown)
William Gibson, Jr., Project Manager, Strategic Petroleum Reserve Project Office

National Nuclear Security Administration

THRU: Frank Russo, NNSA Senior Advisor, Environment, Safety and Health

Manager, Sandia Site Office
Manager, Kansas City Site Office
Manager, Pantex Site Office
Manager, Livermore Site Office
Manager, Nevada Site Office
Manager, Y-12 Site Office
Manager, Savannah River Site Office
Manager, Los Alamos Site Office
Director, NNSA Service Center, Albuquerque
Deputy Administrator for Defense Programs
Deputy Administrator for Nuclear Nonproliferation
Associate Administrator for Infrastructure and Environment
Associate Administrator for Management and Administration

cc: Bruce M. Carnes, Director, Office of Management, MA-1
Rosita O. Parkes, Chief Information Officer, IM-1
DOE Pollution Prevention Coordinators

October 20, 2005

The Federal Electronics Recycling and Reuse Challenge

This November 15th marks the eighth annual America Recycles Day (ARD), a day where all Americans are encouraged to do their part to support environmental stewardship by recycling and buying recycled content products. This year the Office of the Federal Environmental Executive (OFEE), the Federal Electronics Challenge (FEC), and signatory Agencies of the Federal Electronics Stewardship Memorandum of Understanding (MOU) are issuing a special challenge to encourage all Federal facilities to lead by example and recycle, or donate their used computers and other electronic equipment to local schools or Hurricanes Katrina and Rita relief efforts.

The Federal government is the largest information technology (IT) equipment and service purchaser in the world, with an IT budget of over \$60 billion in FY 2005. Unfortunately when new equipment is purchased, the previous generations of equipment sit unused, tucked away in basements, closets, and warehouses of Federal facilities across the nation, with no plans for their future. Much of this equipment can be either recycled, or reused, in the communities where we live and in the workplace.

To encourage Federal facilities and agencies to improve their used electronics management, OFEE, the FEC, and MOU Agency members will launch the **Federal Electronics Recycling and Reuse Challenge**. This program will begin on November 15, 2005, and conclude on Earth Day, April 22, 2006, where selected facilities will receive national recognition by the Federal Environmental Executive at an awards ceremony based on the amount of electronics recycled or donated during the five month period between ARD 2005 and Earth Day 2006.

On November 10, 2005 we will post a new web site: www.federalelectronicschallenge.net/errc, where you can get more information about the program, register to participate, and obtain tools that will help your facility participate in the Challenge, as well as improve management of your used electronics.

I encourage all Federal facilities to participate and further contribute to our Nation's efforts to recycle used electronics. If you any questions, please contact Juan Lopez, at 202-564-5214, lopez.juan@ofee.gov; Laura Nazef, at 202-564-7523, nazef.laura@epa.gov; or Chris Newman, at 312-353-8402, newman.christopherm@epa.gov, for more information.

Sincerely,

Edwin Piñero
Federal Environmental Executive
